2017-2018 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 12, Mar. 18th, 2018– Mar. 24th, 2018)

Highlights

- In week 12 of 2018, trends for individual preliminary local flu activity indicators were mixed with increases in some key indicators. As a whole, flu intensity (composite indicator) increased and remains at moderate, but is bordering high.
- Geographic spread and local intensity designation (Click here for definitions) = WIDESPREAD, MODERATE
- Local medical facility labs reported 1,691 tests run with 316 (18.7%) positive results for week 12 of 2018.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased slightly compared to last week. The percentage of ED visits for ILI is above while respiratory symptom visits are above their respective baseline averages for the week.
- In week 12 of 2018, trends for local over-the-counter medication category sales tracked generally increased (increase in cough and cold, electrolyte, adult anti-fever, pediatric anti-fever and throat lozenge sales; decrease in thermometer sales; stable chest rub sales) compared to last week.
- Nationally, influenza activity decreased. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

1Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
2Number of weeks: "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).
3Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
4Data Source: Medical claims data from athenaHealth (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
5Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 12, the preliminary local influenza and influenza-like-Ilness (ILI) visit rate to athenaHealth® providers (7.5 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 12 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 12 of 2018, 2.5% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 12.

Laboratory Surveillance
During week 12 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,691 specimens, with 316 (18.7%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 12 of 2018 is 56,210 with 11,297 (20.1%) positives (8,296 type A, 2,993 type B, 7 type A and B, 1 type unknown).

Nationally in week 12 of 2018, clinical laboratories reported 24,329 specimens tested for influenza viruses, 3,575 (14.7%) of which were positive (1,509 type A, 2,066 type B). Public health laboratories reported testing 935 specimens, 368 of which were positive (131 type A – of which 34 were A(H1N1)pdm09, 90 were H3N2, and 7 were not subtyped; 237 type B – of which 149 were Yamagata lineage, 11 were Victoria lineage, and 77 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 12, Ohio clinical labs reported 67,347 specimens tested for influenza this season thus far. Positive results include: (181) A(H1N1)pdm09; (604) A/H3N2; (10,720) Flu A Not Subtyped, and (3,285) Flu B (through 3/24/18). In week 12, ODH Public Health Lab reported 1,138 specimens tested for influenza from various submitters this season thus far. Positive results include: (101) A(H1N1)pdm09; (681) A/H3N2; (141) Influenza B (through 3/24/18). Please visit the ODH website for more information.

ED Respiratory Visits
In the 12th week of 2018, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 12 of 2018, trends for local over-the-counter medication category sales tracked generally increased (increase in cough and cold, electrolyte, adult anti-fever, pediatric anti-fever and throat lozenge sales; decrease in thermometer sales; stable chest rub sales) compared to last week.
