2017-2018 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 18, Apr. 29th, 2018– May. 5th, 2018)

Highlights

- In week 18 of 2018, trends for individual preliminary local flu activity indicators were mixed, with key indicators decreasing, compared to last week. As a whole, flu intensity (composite indicator) decreased and is low.
- Geographic spread and local intensity designation (Click here for definitions) = LOCALized, LOW
- Local medical facility labs reported 903 tests run with 60 (6.6%) positive results for week 18 of 2018.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased slightly compared to last week. The percentage of ED visits for ILI and respiratory symptoms are above their respective baseline averages for the week.
- In week 18 of 2018, the trends for local over-the-counter medication category sales tracked were mixed (decrease in throat lozenge sales; increase in cough and cold and thermometer sales; stable electrolyte, chest rub, pediatric anti-fever, adult anti-fever sales) compared to last week.
- Nationally, influenza activity decreased. Please visit the CDC website for specific information.

1Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
2Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).
3Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
4Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
5Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 18, the preliminary local influenza and influenza-like illness (ILI) visit rate to athenaHealth® providers (1.8 per 1,000 visits) decreased compared to the previous week and is similar to its baseline average for the week (Figure 1). The week 18 percentage of all Emergency Department (ED) visits categorized as ILI decreased slightly compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 18 of 2018, 1.5% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 18.

Laboratory Surveillance
During week 18 of 2018, reporting Franklin County sentinel medical facility laboratories tested 903 specimens, with 60 (6.6%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 18 of 2018 is 63,910 with 12,279 (19.2%) positives (8,501 type A, 3,770 type B, 7 type A and B, 1 type unknown).

Nationally in week 18 of 2018, clinical laboratories reported 11,110 specimens tested for influenza viruses, 721 (6.5%) of which were positive (252 type A, 469 type B). Public health laboratories reported testing 345 specimens, 86 of which were positive (28 type A – of which 12 were A(H1N1)pdm09, 11 were H3N2, and 5 was not subtyped; 58 type B – of which 49 were Yamagata lineage, 3 were Victoria lineage, and 6 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 18, Ohio clinical labs reported 78,878 specimens tested for influenza this season thus far. Positive results include: (208) A(H1N1)pdm09; (644) A/H3N2; (11,351) Flu A Not Subtyped, and (4,478) Flu B (through 5/5/18). In week 18, ODH Public Health Lab reported 1,239 specimens tested for influenza from various submitters this season thus far. Positive results include: (105) A(H1N1)pdm09; (683) A/H3N2; (200) Influenza B (through 5/5/18). Please visit the ODH website for more information.

ED Respiratory Visits
In the 18th week of 2018, the percentage of all ED visits categorized as respiratory decreased slightly compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 18 of 2018, the trends for local over-the-counter medication category sales tracked were mixed (decrease in throat lozenge sales; increase in cough and cold and thermometer sales; stable electrolyte, chest rub, pediatric anti-fever, adult anti-fever sales) compared to last week.
