### Highlights

- In week 40 of 2017, the individual local flu activity indicator trends were mixed compared to last week, with the majority above their baseline averages. As a whole, flu intensity (composite indicator) was low for the week.
- Geographic spread and local intensity designation (Click [here](link) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 584 tests run with 3 (0.5%) positive results for week 40 of 2017.
- The percentage of ED visits for influenza-like-illness (ILI) was stable, while respiratory symptom visits decreased slightly compared to last week. The percentage of ED visits for ILI was above, while respiratory visits were similar to their respective baseline averages for the week.
- In week 40 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, and chest rub sales; decrease in cough and cold, pediatric anti-fever, and throat lozenge sales; stable adult anti-fever sales) compared to last week.
- Nationally, influenza activity was low. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

*Combination of Lab Data, Primary Care Physician Medical Claims Data, ED Visit Data, and Influenza Associated Hospitalizations.

†Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

‡Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

§Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

¶Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 40, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (0.3 per 1,000 visits) decreased compared to the previous week and is below its baseline average for the week (Figure 1). The week 40 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 40 of 2017, 1.4% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 40.

Laboratory Surveillance
During week 40 of 2017, reporting Franklin County sentinel medical facility laboratories tested 584 specimens, with 3 (0.5%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 40 of 2017 is 3,083 with 18 (0.6%) positives (9 type A, 9 type B, 0 type A and B, 0 type unknown).

Nationally in week 40 of 2017, clinical laboratories reported 10,152 specimens tested for influenza viruses, 270 (2.7%) of which were positive (182 type A, 88 type B). Public health laboratories reported testing 407 specimens, 72 of which were positive (62 type A – of which 6 were A(H1N1)pdm09, 49 were A/H3, and 7 were not subtyped; 10 type B – of which 5 were Yamagata lineage, 0 were Victoria lineage, and 5 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

Week 40 of 2017 statewide clinical and public health laboratory data was not available at the time of this report. Please visit the ODH website for more information.

ED Respiratory Visits
In the 40th week of 2017, the percentage of all ED visits categorized as respiratory decreased slightly compared to the percentage seen the previous week and is similar to its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 40 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, and chest rub sales; decrease in cough and cold, pediatric anti-fever, and throat lozenge sales; stable adult anti-fever sales) compared to last week.
