
**Highlights**

- In week 43 of 2017, the individual local flu activity indicator trends were mixed compared to last week. As a whole, flu intensity (composite indicator) was low for the week and was stable compared to the preceding week.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 893 tests run with 3 (0.3%) positive results for week 43 of 2017.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms were stable compared to last week.
- In week 43 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, and throat lozenge sales; decrease in cough and cold and adult anti-fever sales; stable chest rub and pediatric anti-fever sales) compared to last week.
- Nationally, influenza activity was low. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

†Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "*= Stable (-2% to +2%).

‡Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

$m^*$Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

$^m$Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 43, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (1.5 per 1,000 visits) increased compared to the previous week and is slightly below its baseline average for the week (Figure 1). The week 43 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 43 of 2017, 1.5% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 43.

Laboratory Surveillance
During week 43 of 2017, reporting Franklin County sentinel medical facility laboratories tested 893 specimens, with 3 (0.3%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 43 of 2017 is 6,076 with 34 (0.6%) positives (14 type A, 20 type B, 0 type A and B, 0 type unknown).

Nationally in week 43 of 2017, clinical laboratories reported 11,775 specimens tested for influenza viruses, 336 (2.9%) of which were positive (228 type A, 108 type B). Public health laboratories reported testing 694 specimens, 119 of which were positive (109 type A – of which 14 were A(H1N1)pdm09, 88 were A/H3, and 7 were not subtyped; 10 type B – of which 5 were Yamagata lineage, 0 were Victoria lineage, and 5 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 43 of 2017, participating Ohio clinical labs reported 4,590 specimens tested for influenza this season thus far. Positive results include: (0) A(H1N1)pdm09; (2) A/H3N2; (26) Flu A Not Subtyped, and (15) Flu B (through 10/28/17). ODH Public Health Lab reported 4 specimens tested for influenza from various submitters this season thus far. Positive results include: (1) A(H1N1)pdm09; (3) A/H3N2; (0) Influenza B (through 10/28/17). Please visit the ODH website for more information.

ED Respiratory Visits
In the 43rd week of 2017, the percentage of all ED visits categorized as respiratory was stable compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 43 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, and throat lozenge sales; decrease in cough and cold and adult anti-fever sales; stable chest rub and pediatric anti-fever sales) compared to last week.
