### Highlights
- In week 45 of 2017, the individual local flu activity indicator values were mixed compared to last week. As a whole, flu intensity (composite indicator) increased compared to last week and continues to be low.
- Geographic spread and local intensity designation (Click here for definitions) = SPORADIC, LOW
- Local medical facility labs reported 1,036 tests run with 12 (1.2%) positive results for week 45 of 2017.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased compared to last week. The percentage of ED visits for both ILI and respiratory symptoms were above their respective baseline averages for the week.
- In week 45 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, adult anti-fever, and pediatric anti-fever sales; decrease in cough and cold, chest rub, and throat lozenge sales) compared to last week.
- Nationally, influenza activity is increasing. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

1^Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
2^Number of weeks: "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).
3^Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
4^Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
5^Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
6^Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 45, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (0.6 per 1,000 visits) decreased compared to the previous week and is below its baseline average for the week (Figure 1). The week 45 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 45 of 2017, 1.9% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 45.

Laboratory Surveillance
During week 45 of 2017, reporting Franklin County sentinel medical facility laboratories tested 1,036 specimens, with 12 (1.2%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 45 of 2017 is 8,047 with 51 (0.63%) positives (26 type A, 25 type B, 0 type A and B, 0 type unknown).

Nationally in week 45 of 2017, clinical laboratories reported 15,254 specimens tested for influenza viruses, 677 (4.4%) of which were positive (507 type A, 170 type B). Public health laboratories reported testing 714 specimens, 173 of which were positive (154 type A – of which 12 were A(H1N1)pdm09, 135 were A/H3, and 7 were not subtyped; 19 type B – of which 8 were Yamagata lineage, 2 were Victoria lineage, and 9 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 45 of 2017, participating Ohio clinical labs reported 7,097 specimens tested for influenza this season thus far. Positive results include: (0) A(H1N1)pdm09; (2) A/H3N2; (40) Flu A Not Subtyped, and (19) Flu B (through 11/16/17). ODH Public Health Lab reported 10 specimens tested for influenza from various submitters this season thus far. Positive results include: (1) A(H1N1)pdm09; (5) A/H3N2; (0) Influenza B (through 11/16/17). Please visit the ODH website for more information.

ED Respiratory Visits
In the 45th week of 2017, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 45 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, adult anti-fever, and pediatric anti-fever sales; decrease in cough and cold, chest rub, and throat lozenge sales) compared to last week.
