2018-2019 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 42, Oct. 14th, 2018– Oct 20th, 2018)

Highlights
- In week 42 of 2018, the majority of individual local flu activity indicator trends increased compared to last week. As a whole, flu intensity (composite indicator) increased slightly but continues to be low.
- Geographic spread and local intensity designation (Click here for definitions) = SPORADIC, LOW
- Local medical facility labs reported 1,026 tests run with 8 (0.8%) positive results for week 42 of 2018.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased slightly compared to last week.
- In week 42 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in electrolyte and adult anti-fever sales; increase in cough and cold, thermometer, chest rub, and throat lozenge sales; stable pediatric anti-fever and sales) compared to last week.
- Nationally, influenza activity remains low. Please visit the CDC website for specific information.

IAH comparison by Flu Season (October - May or Weeks 35 - 20)

*Current season (2018-19) is from week 35 through week 20.

1Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
2Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "▲▼" = Stable (-2% to +2%).
3Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
4Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
5Franklin County, OH residents only (based on zip code). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 42, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (1.3 per 1,000 visits) increased slightly compared to the previous week and is below its baseline average for the week (Figure 1). The week 42 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 42 of 2018, 1.5% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 42.

Laboratory Surveillance
During week 42 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,026 specimens, with 8 (0.8%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 42 of 2018 is 4,837 with 34 (0.74%) positives (12 type A, 22 type B, 0 type A and B, 0 type unknown).

Nationally in week 42 of 2018, clinical laboratories reported 13,434 specimens tested for influenza viruses, 76 (0.6%) of which were positive (47 type A, 29 type B). Public health laboratories reported testing 580 specimens, 53 of which were positive (41 type A – of which 21 were A(H1N1)pdm09, 6 were H3N2, and 14 were not subtyped; 12 type B – of which 0 were Yamagata lineage, 1 was Victoria lineage, and 11 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 42, Ohio clinical labs reported 3,459 specimens tested for influenza this season thus far. Positive results include: (1) A(H1N1)pdm09; (0) A/H3N2; (5) Flu A Not Subtyped, and (4) Flu B (through 10/20/2018). In week 42, ODH Public Health Lab reported 3 specimens tested for influenza from various submitters this season thus far. Positive results include: (3) A(H1N1)pdm09; (0) A/H3N2; (0) Influenza B (through 10/20/2018). Please visit the ODH website for more information.

ED Respiratory Visits
In the 42nd week of 2018, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 42 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in electrolyte and adult anti-fever sales; increase in cough and cold, thermometer, chest rub, and throat lozenge sales; stable pediatric anti-fever and sales) compared to last week.
