Reportable Conditions (Cumulative Numbers as of Nov. 11, 2018)

- Influenza Associated Death Reported by Year (based on date of death)
  - 2013: 0, 2014: 0, 2015: 0, 2016: 0, 2017: 0, 2018 YTD: 0
- Influenza Associated Hospitalizations (IAH) Reported by Admission Year

*Current season (2018-19) is from week 35 through week 45.

1. Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
2. Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "▲" = Stable (-2% to +2%).
3. Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
4. Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are reviewed.
5. Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
6. Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 45, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (2.7 per 1,000 visits) increased compared to the previous week and is slightly above its baseline average for the week (Figure 1). The week 45 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 45 of 2018, 1.9% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 45.

Laboratory Surveillance
During week 45 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,246 specimens, with 14 (1.1%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 45 of 2018 is 8,456 with 71 (0.84%) positives (34 type A, 37 type B, 0 type A and B, 0 type unknown).

Nationally in week 45 of 2018, clinical laboratories reported 16,335 specimens tested for influenza viruses, 189 (1.2%) of which were positive (152 type A, 37 type B). Public health laboratories reported testing 620 specimens, 94 of which were positive (84 type A – of which 57 were A(H1N1)pdm09, 6 were H3N2, and 21 were not subtyped; 10 type B – of which 4 were Yamagata lineage, 3 was Victoria lineage, and 3 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 45, Ohio clinical labs reported 8,572 specimens tested for influenza this season thus far. Positive results include: (2) A(H1N1)pdm09; (0) A/H3N2; (28) Flu A Not Subtyped, and (12) Flu B (through 11/10/2018). In week 45, ODH Public Health Lab reported 11 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (10) A(H1N1)pdm09; (0) A/H3N2; (1) Influenza B (through 11/10/2018). Please visit the ODH website for more information.

ED Respiratory Visits
In the 45th week of 2018, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 45 of 2018, trends for local over-the-counter medication category sales tracked generally increased compared to last week (decrease in pediatric anti-fever sales; increase in cough and cold, electrolyte, thermometer, chest rub, adult anti-fever, and throat lozenge sales) compared to last week.
