Highlights

- In week 48 of 2018, the individual local flu activity indicator trends were mixed compared to last week. As a whole, flu intensity (composite indicator) decreased slightly and continues to be low.
- Geographic spread and local intensity designation (Click here for definitions) = REGIONAL, LOW
- Local medical facility labs reported 1,473 tests run with 46 (3.1%) positive results for week 48 of 2018.
- The percentage of ED visits for influenza-like-illness (ILI) increased slightly, while respiratory symptom visits was stable compared to last week.
- In week 48 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in electrolyte, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increase in cough and cold, thermometer, and chest rub sales) compared to last week.
- U.S. influenza activity influenza activity increased slightly. Please visit the CDC website for specific information.

  Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

  Number of weeks “▲” = Increase (>2%), “▼” = Decrease (>2%), “△” = Stable (-2% to +2%).

  Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

  Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

  Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 48, the preliminary Ohio (statewide) influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (3.3 per 1,000 visits) increased compared to the previous week and is similar to its baseline average for the week (Figure 1). The week 48 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 48 of 2018, 2.2% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is similar to the national baseline of 2.2% for week 48.

Laboratory Surveillance
During week 48 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,473 specimens, with 46 (3.1%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 48 of 2018 is 12,530 with 165 (1.3%) positives (105 type A, 58 type B, 0 type A and B, 2 type unknown).

Nationally in week 48 of 2018, clinical laboratories reported 21,851 specimens tested for influenza viruses, 925 (4.2%) of which were positive (846 type A, 79 type B). Public health laboratories reported testing 670 specimens, 180 of which were positive (170 type A – of which 125 were A(H1N1)pdm09, 27 were H3N2, and 18 were not subtyped; 10 type B – of which 7 were Yamagata lineage, 0 was Victoria lineage, and 3 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 48, Ohio clinical labs reported 14,000 specimens tested for influenza this season thus far. Positive results include: (9) A(H1N1)pdm09; (0) A/H3N2; (89) Flu A Not Subtyped, and (19) Flu B (through 12/01/2018). In week 48, ODH Public Health Lab reported 20 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (19) A(H1N1)pdm09; (0) A/H3N2; (1) Influenza B (through 12/01/2018). Please visit the ODH website for more information.

ED Respiratory Visits
In the 48th week of 2018, the percentage of all ED visits categorized as respiratory was stable compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 48 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in electrolyte, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increase in cough and cold, thermometer, and chest rub sales) compared to last week.
