2015-2016 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 10, Mar 6th, 2016 - Mar 12th, 2016)

Highlights
- In week 10 of 2016, the majority of individual local flu activity indicator trends increased. Overall, flu intensity was high for week 10, and continued its increasing trend seen the past few weeks. Notable increases include percent lab positives and confirmed influenza-associated hospitalizations.
- Geographic spread and local intensity designation (Click here for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 2,320 tests run with 564 (24.3%) positive results for week 10 of 2016. This is higher than last week’s 18.2% and is higher than the weekly baseline.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased slightly compared to week 9. The percentage of ED visits for both ILI and respiratory symptoms are higher than their respective baseline averages for the week.
- In week 10 of 2016, the majority of trends for local over-the-counter medication sales tracked decreased (decrease in cough and cold, electrolyte, chest rub, pediatric anti-fever, and adult anti-fever sales; increase in thermometer sales; and stable throat lozenge sales) compared to last week.
- Nationally in week 10, influenza activity increased in the United States. Please visit the CDC website for specific information (National data is usually updated on Friday of each week).

*Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

5Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

7Franklin County, OH residents only (based on zip code). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
CDC 122-Cities Mortality Reporting System: Pneumonia and Influenza (P&I) Mortality
In week 10 of 2016, 7.7% of all Columbus and Franklin County deaths were attributed to pneumonia and influenza. Nationally in week 10, 6.9% of deaths reported were attributed to pneumonia and influenza. This national percentage was below the national epidemic threshold for week 10.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports
In week 10, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (6.2 per 1,000 visits) was stable compared to the previous week and is above its baseline average for the week (Figure 1). The week 10 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is higher than its historic baseline for the week.

Nationally, during week 10 of 2016, 3.7% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.1% for week 10.

Laboratory Surveillance
During week 10 of 2016, reporting Franklin County sentinel medical facility laboratories tested 2,320 specimens, with 564 (24.3%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2014 through week 10 of 2016 is 26,712 with 1,522 (5.7%) positives (1,358 type A, 160 type B, 4 both A and B, 0 type unknown).

Nationally in week 10 of 2016, clinical laboratories reported 25,855 specimens tested for influenza viruses, 5,968 (23.1%) of which were positive (4,557 type A, 1,411 type B). Public health laboratories reported testing 2,027 specimens, 1,294 of which were positive (1,055 type A – of which 843 were A(H1N1)pdm09, 114 were A/H3, and 98 were not subtyped; 239 type B – of which 79 were Yamagata lineage, 37 were Victoria lineage, and 123 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 10 of 2016, participating Ohio clinical labs reported 19,018 specimens tested for influenza this season thus far. Positive results include: (184) A(H1N1)pdm09; (5) A/H3N2; (602) Flu A Not Subtyped, and (135) Flu B (through 3/12/16). ODH Public Health Lab reported 311 specimens tested for influenza from various submitters this season thus far. Positive results include: (153) A(H1N1)pdm09; (7) A/H3N2; (19) Influenza B (through 3/12/16). Please visit the ODH website for more information.

ED Respiratory Visits
In the 10th week of 2016, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is higher than its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 10 of 2016, the majority of trends for local over-the-counter medication sales tracked decreased (decrease in cough and cold, electrolyte, chest rub, pediatric anti-fever, and adult anti-fever sales; increase in thermometer sales; and stable throat lozenge sales) compared to last week.
