2015-2016 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 45, Nov 8th, 2015–Nov 14th, 2015)

**Highlights**

- In week 45, local flu activity indicator trends were mixed. In general, local flu intensity continues to be low and was slightly higher than the previous week.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 780 tests run with 9 (1.2%) positive results for week 45 of 2015. This is higher than last week’s 0.74% and is similar to the weekly baseline.
- The percentage of ED visits for influenza-like-illness (ILI) and respiratory symptoms were both stable compared to week 44. The percentage of ED visits for ILI is slightly above the baseline average while respiratory symptom visits are similar to its weekly baseline average.
- In week 45 of 2015, trends for the local over-the-counter medication sales were mixed (increase in cough and cold, electrolyte, chest rub, and throat lozenge sales; decrease in thermometer, adult anti-fever, and pediatric anti-fever sales) compared to last week.
- Nationally in week 45, influenza activity increased slightly. Please visit the [CDC website for specific information](#) (National data is usually updated on Friday of each week).

1Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

2Number of weeks: "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (2% to +2%).

3Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

4Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians.

5Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
**CDC 122-Cities Mortality Reporting System: Pneumonia and Influenza (P&I) Mortality**

In week 45 of 2015, 4.9% of all Columbus and Franklin County deaths were attributed to pneumonia and influenza. Nationally, 5.3% of deaths reported were attributed to pneumonia and influenza in week 45. This national percentage is below the national epidemic threshold of 6.3% for week 45.

**Influenza Morbidity and Influenza-Like Illness (ILI) Reports**

In week 45, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (3.1 per 1,000 visits) increased compared to the previous week and is above the baseline average for the week (Figure 1). The week 45 percentage of Emergency Department (ED) visits for ILI symptoms was stable compared to the previous week (Figure 3) and is slightly higher than the historic baseline for the week.

Nationally, during week 45 of 2015, 1.6% of patient visits reported through the US Outpatient Influenza-like Illness Surveillance Network (ILINet), were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.1%.

**Laboratory Surveillance**

During week 45 of 2015, reporting Franklin County sentinel medical facility laboratories tested 780 specimens, with 9 (1.2%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2014 through week 45 of 2015 is 7,016 with 57 (0.8%) positives (37 type A, 19 type B, 1 both A and B, 0 type unknown).

Nationally in week 45 of 2015, clinical laboratories reported 11,899 specimens tested for influenza viruses, 194 (1.6%) of which were positive (111 type A, 83 type B). Public health laboratories reported testing 648 specimens, 25 of which were positive (18 type A – of which 6 were A(H1N1)pdm09, 10 were A/H3, and 2 were not subtyped; 7 type B – of which 2 were Victoria lineage, 1 was Yamagata lineage, and 4 lineage not performed). Please visit the CDC website for more information.

Participating Ohio clinical labs reported 3,767 specimens tested for influenza this season thus far. Positive results include: (1) A(H1N1)pdm09; (1) A/H3N2; (8) Flu A Not Subtyped, and (5) Flu B (through 11/14/15). ODH Public Health Lab reported 53 specimens tested for influenza from various submitters this season thus far. Positive results include: (2) A(H1N1)pdm09; (0) A/H3N2; (0) Influenza B (through 11/14/15). Please visit the ODH website for more information.

**ED Respiratory Visits**

In the 45th week of 2015, the percentage of all ED visits categorized as respiratory was stable compared to the percentage seen the previous week and is similar to its historic baseline for the week (Figure 5).

**Over-the-Counter (OTC) Medication Sales**

In week 45 of 2015, trends for the local over-the-counter medication sales tracked were mixed (increase in cough and cold, electrolyte, chest rub, and throat lozenge sales; decrease in thermometer, adult anti-fever, and pediatric anti-fever sales) compared to last week.
